EDUCATION

San Francisco State University, College of Engineering

San Francisco, CA

BS in Computer Engineering

May 2027 ; GPA: 3.95/4.00

- Relevant Coursework: Python, C, Linux OS, Circuits Analysis, Signals & Systems Analysis, Microcontrollers (STM32, Arduino), PCB Design, Digital Design, Computer Systems, Verilog, AI/ML, Embedded Systems
- Awards: Dean's List (Fall 2023 – Spring 2026) ; Tau Beta Pi Member

EXPERIENCE

Skylark Labs

December 2025 – Present

Robotics Engineer Intern

- Calibrated teleoperation sensors using Meta Quest and Virdyn hand tracking hardware, validating joint and torque limits across Unitree G1 and H1 humanoid robots, Go1, Go2, and Go2-W quadrupeds, and drones.
- Troubleshooting hardware and software issues related to power, controls, sensors, and end-effectors during robot bring-up.
- Assembled and validated 10+ electromechanical subsystems, including motors, joints, grippers, and mechanical assemblies.

InfoComply

June 2025 – December 2025

Software Engineer

- Led the launch of 2 SaaS products on Salesforce AppExchange and ServiceNow Store, overseeing test-case validation.
- Designed a centralized Agent Management System on ServiceNow that consolidates AI agent billing, token usage, updates, and lifecycle management for enterprise clients.
- Built marketing tools to support product launches and accelerate adoption.

AccoAI

June 2024 – August 2024

Software Engineer Intern

- Joined AI accounting startup (\$3M valuation, \$200K+ raised) as engineer #3 and first intern; shipped features to 100+ enterprises.
- Built a CRM system end-to-end using Next.js, React, and Python; scaled to 3 servers, 100 users, and 99.9% uptime.
- Expanded client base from 30% to 120% by generating a personalized outbound AI agent; boosted revenue by \$50K+.

PROJECTS

Stereo Audio Amplifier PCB — KiCad, Analog Circuits, PCB Design

April 2026 – May 2026

- Designed a custom two-channel audio amplifier PCB in KiCad featuring AD797 op-amps, complementary transistor output stages, and regulated ± 15 V power rails.
- Created schematics, routed a two-layer PCB, generated Gerber fabrication files, and hand-assembled the manufactured through-hole board.

Cyclone Arcade Game | STM32 Microcontroller, Embedded C, Circuits

November 2025 – December 2025

- Developed a mini arcade light-chasing game on an STM32L476RG MCU using embedded C and STM32CubeIDE.
- Fabricated a custom hardware interface and 3D-printed enclosure, delivering a complete embedded mechatronic build.

Bookie Bot | JavaScript

January 2024 – May 2025

- Built a Discord bot as an interactive game platform supporting 100+ concurrent users; earned 10,000+ in revenue
- Boosted user engagement 40% by diversifying game options (Crash, Coin Flip) and building a tab management system.

TECHNICAL SKILLS

Hardware & Platforms: STM32, Arduino UNO, FPGA, KiCad, PSpice/LTSpice, AutoCAD, SolidWorks, Fusion360

Programming Languages: C, Embedded C, Python, Java, JavaScript, RISC-V

Software Platforms: ServiceNow (Admin Certified), Salesforce (Admin Certified), Excel, Github, QGroundControl, MissionPlanner

Spoken Languages: English (Primary), Telugu, Hindi, Chinese (Limited Workplace Proficiency)
